Work Done indicates Don Barber's primary responsibilities as research or survey technician on each cruise:

- Chlorophyll: analyses of phytoplankton biomass per unit volume using shipboard Turner™ fluorometer.
- Primary productivity: shipboard phytoplankton growth rate experiments involving ¹⁴C uptake analysis.
- Side Scan Sonar and Seismic Profiling: seafloor & sub-bottom surveys using towed geophysical equipment.
- Bottom samples: Smith-McIntyre grabs; Piston- and Vibracoring: stratigraphic core logging and sampling.
