**Work Done** indicates Don Barber's primary responsibilities on each cruise:

- Chlorophyll: analyses of phytoplankton biomass per unit volume using shipboard Turner™ fluorometer.
- Primary productivity: shipboard phytoplankton growth rate experiments involving <sup>14</sup>C uptake analysis.
- Side Scan Sonar and Seismic Profiling: seafloor & sub-bottom surveys using towed geophysical equipment.
- Bottom samples: Smith-McIntyre grabs; piston- and vibracores: sub-bottom coring, logging and sampling.
