

**BRYN MAWR
DISTRESSING
MATH
COLLECTIVE**

**ETHICS AND THE USE OF
MATHEMATICS, WITH A FOCUS
ON ANTI-RACISM**

Jackie Arroyo '22

Thinking deeply about ethics is an essential part of training in most scientific disciplines. In spite of the practice of mathematics having a mammoth impact on all human beings and the natural world, this is generally not the case for mathematicians. Given the ongoing national discussion around police violence, the climate crisis, the pandemic, and the many ways in which mathematical technologies are used to analyze these problems and implement solutions, this educational gap can no longer be acceptable in the mathematical community. Come gain some insight and productive discussion on more of these vital topics!
