

# *Euclid and His Modern Rivals*

**Kat Margaret Phifer '19**

Lewis Carroll's *Euclid and His Modern Rivals* is a play that discusses numerous different geometry textbooks, ultimately deciding that none are as complete or elegant as Euclid's *Elements*. The play discusses many different figures in math history as well as a wide range of geometrical topics.

At this DMC talk, we will be doing an out loud reading of an excerpt of this play.
